*Here is the finest ebook i have got read until now. It really is simplistic but excitement within the 50 percent in the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Medicine and Disease in Philippines This subject should be treated by some one who has personal information, but our army and navy medical officers have doubtless been too much occupied by their duties to indulge in study or composition. The medical department at Washington has as yet issued no reports, while standard works on geographic pathology give but little attention to the Philippines, and original ones by Filipino or Spanish authors are not accessible to many American readers. Yet the Philippine Islands, with their teeming millions of inhabitants, are on our hands and we must face our duty toward them. All this is my apology for presenting this paper, which contains in condensed and systematized shape all the data that I have gathered from a number of authorities, whose titles are given in the bibliographic index at the end of the article. Modern medicine bases its classification of diseases on etiology; and with the aid of bacteriology is rapidly studying and cataloguing the etiologic factors of disease. Still we have not yet advanced far enough to dispense with the old views as to the influence, causal or conditional, of physical environment, such as climate, temperature, food, etc. These factors must still remain, if not as causes, at least as conditions. They may be the tertium quid, the copula between the microbe and its victim, increasing or inhibiting its potency or virulence, and hence it is necessary to mention briefly the climatic conditions of the islands.
