The easy-to-use guide to interpreting candlestick charts and derivative markets Candlestick charts are an effective way of visualizing price movements and, due to the increased interest in the complex derivatives market, they are being used more and more widely. Candlestick charts are formed with the help of the opening, high, low, and closing price of the day if the opening price is above the closing price then a filled candlestick is drawn, and these charts are visual aids for decision making in forex, stock, commodities, and options trading. * Contains alphabetical explanations of over 200 candlestick and related terms * Includes daily charts of 50 companies, and six-month charts for comparative explanations of candlesticks with Western-style technical indicators * Written by Michael C.
